

EDUCATION

- **Halle Institute for Economic Research** Halle (Saale), Germany
Ph.D. Economics (candidate) 10/23 - Present
Dissertation (in progress): “Essays on Entrepreneurship, Market Power and Firm Dynamics”
- **London School of Economics and Political Science** London, UK
M.Sc. Economics 09/22 - 07/23
- **Universidad de los Andes** Bogota, Colombia
B.A. Economics, LL.B. Law 07/13 - 10/19

RESEARCH WORK IN PROGRESS

- **“Determinants of the Transition from Informality to Formality for Micro-Firms in Colombia”**
Most micro-firms in emerging economies remain informal and comparatively less productive than micro-firms in larger economies, yet a small subset successfully formalizes. Using data from the Colombian Longitudinal Survey (ELCA), this project investigates the drivers of microfirms’ decision to transition to formality.
- **“Plant Acquisitions and Labor Market Power: The Case of France’s Loi Florange”**
France’s Florange Law, enacted in 2014, requires companies employing at least 1,000 workers to actively seek potential buyers before proceeding with site closures. I exploit plausibly exogenous variation induced by this legislative size threshold to analyze the effect of plant acquisitions on downstream labor market outcomes.
- **“Intellectual Property, Knowledge Diffusion and Business Dynamism”** (with Magnuson, Mertens, Miranda)
Using scrapped patent data and balance sheet data for French manufacturing firms, we show that reduced knowledge diffusion within industry are correlated with increased markups and industry concentration, as well as lower labor reallocation, firm entry and young-firm employment shares.
- **“The Role of Data Investments in Firm Export Dynamics”** (with Magnuson)
Using LinkedIn employee compensation and French administrative datasets, we show that data investments increase the likelihood of firms entering and staying in exporting, and they increase and stabilize export revenues. Simulations show that data productivity leads to faster foreign market entry and greater industry concentration.

RESEARCH AND PROFESSIONAL EXPERIENCE

- **The Competitiveness Research Network (CompNet)** Halle (Saale), Germany
Research Analyst, Micro Data Infrastructure (part time) 10/23 - Present
 - Created algorithms that standardized metadata for 200+ French administrative datasets, which significantly improved their quality and comparability for integration into a European microdata infrastructure.
 - Implemented statistical programming research modules using harmonized datasets to conduct cross-country economic analysis on firm dynamics, trade and competitiveness, monetary policy, and energy efficiency.
- **Central Bank of Colombia** Bogota, Colombia
Analyst, International Investments Department 03/20 - 04/21
 - Drafted reports on sovereign wealth fund rebalancing, legal risk mitigation, and external manager performance.*Intern, Labor Markets Analysis Group, Macroeconomic Modelling Department* 01/19 - 06/19
 - Designed the econometric identification strategy, and performed economic analysis for a research paper analyzing the effect of rising unemployment on labor supply dynamics throughout the business cycle.

ADDITIONAL EXPERIENCE

- **What Works Centre for Local Economic Growth at LSE** London, UK
Research Assistant (part time) 11/22 - 07/23
- **Constitutional Court of Colombia** Bogota, Colombia
Law Clerk 04/21 - 08/22

LEADERSHIP AND AWARDS

- Colombian Ministry of Education Saber Pro Recognition for highest scores in the national higher education exam.
- *Quiero Estudiar Escala* merit and need-based scholarship for undergraduate studies.

LANGUAGES AND INTERESTS

- **Software and Programming:** Stata, R, Python, Git, MATLAB, L^AT_EX.
- **Languages:** Spanish (native), English (fluent), French (intermediate), German (basic).
- **Interests:** Travelling, hiking, cycling and music.
